## **MEDICATION-ASSISTED TREATMENT WITH METHADONE (MAT) LAWS**

*November 2016*

### **Codebook**

This codebook describes the variables in a dataset that examines variation in federal and state laws regulating Medication-Assisted Treatment with Methadone (MAT) laws. The jurisdictions selected for measurements are the United States, all 50 states and the District of Columbia. This dataset is updated through October 1, 2016.

There are six standard variables in every DAPS dataset. They are:

#### **ID:**

An identification code generated by the MonQcle.

#### **FIPS CODE:**

The Federal Information Processing Standard (FIPS) codes are a standardized set of numeric codes issued by the National Institute of Standards and Technology to ensure uniform identification of geographic entities through all federal government agencies.

#### **JURISDICTION:**

This is a dropdown selection in each coding form. It includes the jurisdictions coded in the dataset.

#### **EFFECTIVE DATE:**

This date (MM/DD/YYYY) is the most recent effective date of the legal text captured for this place. The effective date represents the date the policy coded was put into effect.

#### **VALID THROUGH DATE:**

This date (MM/DD/YYYY) is the last date the policy was in effect as reflected by the legal text captured to code this policy.

#### **LEGAL TEXT:**

This is a text box that captures all legal text relevant to the coding questions. This will not download into Microsoft Excel.
