Youth Sports Traumatic Brain Injury

According to an article in the *Journal of Athletic Training*, each year as many as 300,000 young people suffer traumatic brain injuries (TBIs), or what are more commonly known as concussions, from playing sports. TBIs can have serious short and long term health effects and all states have passed laws aimed at reducing harm from brain injuries occurring at youth sports activities. You can see additional maps and tables by visiting www.lawatlas.org.
