Patient Centered Medical Home Laws
Prepared by the Policy Surveillance Program Staff

SUMMARY
This interactive map shows states laws recognizing the patient centered medical home (PCMH) health care delivery model, PCMH insurance type eligibility or incorporation, and details about state PCMH advisory councils. This map also shows states with laws on PCMH state legislature reporting requirements, and on funding sources available for implementation.

ABOUT PATIENT CENTERED MEDICAL HOME LAWS & THE DATA
Patient centered medical homes (PCMH) provide comprehensive patient-centered primary care services to improve the quality, accessibility, affordability, coordination and delivery of health care. The patient centered medical home has become an important health care delivery model in the evolving US health care system.

- Many states have passed laws that create advisory councils to develop policies for implementing the model, and are now requiring public and private health insurance plans to offer and cover PCMH services.
- State PCMH advisory councils may have membership requirements, including physicians, nurse practitioners, pharmacists, mental health specialists, and representatives from state health agencies and community-based organizations. State PCMH laws also govern the specific duties of the advisory councils, which can range from advising on all or only one component of implementation.
- In states that recognize the PCMH model, state health agencies and/or advisory councils may have to report to the legislature on how effectively the model is being implemented. Information that must be reported can include the models’ impact on health care cost savings, health outcomes, and whether there is sufficient funding for implementation.
- States may also permit health agencies and councils to derive funding for implementation from federal, state and local governments as well as private donors.

This dataset is cross-sectional, displaying laws in effect on May 1, 2016.

NAVIGATING THE DATA
There are two ways to navigate the data by clicking the Filter tab or the Explore tab — for each option, the data can be visualized in a map and table format or in jurisdiction profiles.

Filter
The dataset homepage will default to the Filter tab. Here, users may answer a series of questions to learn more about the characteristics of the laws. Answering more than one
question will show all the jurisdictions that meet the combined criteria. Criteria selected will be listed above the questions, and can be removed by clicking the white X or by clicking “Reset” above the questions.

**Explore**

Users can access Explore by clicking the Explore tab in the bar above the questions. Using Explore, users will see the answers to one question across all jurisdictions.

The primary questions in this dataset are:

1. Is there a state law recognizing patient centered medical homes?
2. How is the PCMH model identified in the law?
3. What types of insurance providers incorporate the PCMH model?
4. Does the law establish a PCMH demonstration project?
5. Does the law establish a PCMH advisory council(s)?
6. What bodies are required to report to the legislature on PCMH implementation?
7. Where may PCMH governing bodies seek funding for implementation?

**DISPLAYING THE RESULTS**

There are two display modes once criteria have been selected by using either the Filter or Explore tab — *Map* display mode and *Profiles* display mode.

**Map Display**

LawAtlas.org dataset homepages default to the map display mode. When querying the data using the Filter tab, all jurisdictions that meet the criteria selected will display in one tone of yellow. Those jurisdictions that do not meet the criteria selected will be colored gray. When querying the data using the Explore tab, the map will illuminate with colors from yellow to red that are associated with the various answer choices (the color-coding is defined by the key to the left of the map).

Below the map, a table will appear. Using the Filter or Explore tab to navigate the questions will change the display:

- Using the Filter tab, you can select an unlimited number of criteria and the applicable jurisdictions that meet the combined criteria will be displayed in the table below.
- Using the Explore tab, you can isolate a single criterion and the applicable jurisdictions will appear in the table below.

**Profiles Display**

The Profiles display presents the results of the criteria selected in a text-based format for each applicable jurisdiction. Using the Filter tab, jurisdictions that meet the criteria selected will display. Using the Explore tab, jurisdictions that meet the criterion selected will display. If no criteria are selected, the full profiles for each state will appear under both Filter and Explore.

**Profile Legend**

Within each Profile box, above the questions and answers, there are additional options and information useful in exploring the law:
Toggle Legal Text – Selecting this option will show all the legal text used to answer questions for this jurisdiction.

Toggle Full Place Profile – Selecting this option will show all questions and answers for this jurisdiction, regardless of what was selected using the Filter or Explore tabs.

Toggle Size – Selecting this option will make the profile larger, but will not change the information displayed.

Legal Text History – This interactive timeline displays when changes in the law have occurred within a jurisdiction. Using the arrows to the left or right, users may explore how the law has changed over time as new amendments to the law have been enacted. The timeline will change from gray to a shade of yellow when the jurisdiction passed its first relevant law. Each change in the law after that is marked by a break in the timeline.

Map and Profile Legend
There are a few symbols to be aware of in both Map and Profiles display modes:

Section Symbol – Clicking this symbol will open a window that displays excerpts from the law correspond to the question and answer.

Caution Note – Clicking on this symbol will open a small window that displays text that describes important caveats about the question and answer.

DATASET RESOURCES
Each dataset homepage includes the following resources available for download:

- Data: The Data file exports in CSV format and may contain two tabs. The “Statistical Data” tab contains the legal variables coded in the dataset, displayed as values defined in the accompanying Codebook. The “Summary Data” tab contains the legal variables coded in the dataset in text form, as well as the accompanying citations and any caution notes that may be included. Note: if there is only one tab available for download it will be the “Statistical Data” as described above.

- Codebook: The Codebook defines all of the coded variables in the dataset. The Codebook lists the question, question type, variable name, variable value and variable label. The Codebook should be used in conjunction with the Statistical Data extract.

- Research Protocol: The Research Protocol is a comprehensive document that outlines the entire methodology of the project, including the scope, inclusion and exclusion
criteria, data collection methods, definitions, coding scheme decisions, as well as the quality control process.

- **Summary Report:** The Summary Report provides a snapshot of important findings from the dataset.

**ADDITIONAL INFORMATION**

- This dataset was created by the Temple University Policy Surveillance Program under an intergovernmental personnel agreement (15UPA1504831) with the Centers for Disease Control and Prevention (CDC) Division for Heart Disease and Stroke Prevention’s (DHDSP), Applied Research and Evaluation Branch (AREB). The views expressed are those of the authors, and not the CDC.
