This codebook describes the variables in a dataset that examines patient centered medical home laws. This is a cross-sectional dataset displaying laws in effect on May 1, 2016. The jurisdictions selected for measurement are the 50 states and the District of Columbia.

There are four standard variables in every LawAtlas dataset. They are:

**JURISDICTION:**
This is a dropdown selection in each coding form. It includes the jurisdictions coded in the dataset.

**EFFECTIVE DATE:**
This date (MM/DD/YYYY) is the most recent effective date of the legal text captured for this place. The effective date represents the date the policy coded was put into effect.

**VALID THROUGH DATE:**
This date (MM/DD/YYYY) is the last date the policy was in effect as reflected by the legal text captured to code this policy.

**LEGAL TEXT:**
This is a text box that captures all legal text relevant to the coding questions. This will not download into Microsoft Excel.

**Note:** Binary indicators for each question appear in the statistical extract of the data.
