Pharmacist Scope of Practice Laws
Prepared by the Policy Surveillance Program Staff

SUMMARY
This map focuses on the state laws and regulations that govern a pharmacist’s scope of practice, including pharmacist practices individually, pharmacist practices under a protocol or practice agreement, pharmacist vaccination authority, and the activities pharmacists can delegate to a pharmacy technician.

ABOUT PHARMACIST SCOPE OF PRACTICE LAWS & THE DATA
The data displayed on this map focus on pharmacists who work in retail pharmacies and do not have additional certification for additional practices. The data detail the activities that these pharmacists can perform in non-institutionalized settings as well as the medication therapy management activities that they can complete, with or without a collaborative practice agreement. It also includes the activities a pharmacy technician can perform in the retail setting.

Some findings from the dataset include:

- Every state allows pharmacists to dispense medication with some sort of expanded authority such as substituting the medication, counseling patients on the drug, reviewing the patient profile for various reasons, or refilling the prescription without physician consent in an emergency situation.
- Nine states allow physicians to prescribe medication in some form, whether it is a specific use medication or generally listed in a protocol.
- Forty-two states and the District of Columbia allow pharmacists to administer vaccinations, with 16 of those states allowing the pharmacist to do it independently, with no physician authorization required.
- Forty-seven states and the District of Columbia allow pharmacists to manage a patient’s drug therapy.
- There is variation amongst the jurisdictions regarding the type of activities that a pharmacist can complete, but only 4 of these states allowed a pharmacist to manage drug therapy without authorization from a physician.
- Every state acknowledges pharmacy technicians and their ability to accept responsibilities in a pharmacy setting.

NAVIGATING THE DATA
There are two ways to navigate the data by clicking the Filter tab or the Explore tab — for each option, the data can be visualized in a map and table format or in jurisdiction profiles.
Filter
The dataset homepage will default to the Filter tab. Here, users may answer a series of questions to learn more about the characteristics of the laws. Answering more than one question will show all the jurisdictions that meet the combined criteria. Criteria selected will be listed above the questions, and can be removed by clicking the white X or by clicking “Reset” above the questions.

Explore
Users can access Explore by clicking the Explore tab in the bar above the questions. Using Explore, users will see the answers to one question across all jurisdictions.

The primary questions in this dataset are:
1. What activities are pharmacists explicitly allowed to perform independently?
2. Does the law explicitly allow a pharmacist to administer vaccines?
3. Does the law explicitly allow a pharmacist to manage drug therapy?
4. Does the law allow pharmacists to prescribe medication?
5. What pharmacy activities can a pharmacy technician do?

DISPLAYING THE RESULTS
There are two display modes once criteria have been selected by using either the Filter or Explore tab — Map display mode and Profiles display mode.

Map Display
LawAtlas.org dataset homepages default to the map display mode. When querying the data using the Filter tab, all jurisdictions that meet the criteria selected will display in one tone of yellow. Those jurisdictions that do not meet the criteria selected will be colored gray. When querying the data using the Explore tab, the map will illuminate with colors from yellow to red that are associated with the various answer choices (the color-coding is defined by the key to the left of the map).

Below the map, a table will appear. Using the Filter or Explore tab to navigate the questions will change the display:
- Using the Filter tab, you can select an unlimited number of criteria and the applicable jurisdictions that meet the combined criteria will be displayed in the table below.
- Using the Explore tab, you can isolate a single criterion and the applicable jurisdictions will appear in the table below.

Profiles Display
The Profiles display presents the results of the criteria selected in a text-based format for each applicable jurisdiction. Using the Filter tab, jurisdictions that meet the criteria selected will display. Using the Explore tab, jurisdictions that meet the criterion selected will display. If no criteria are selected, the full profiles for each state will appear under both Filter and Explore.

Profile Legend
Within each Profile box, above the questions and answers, there are additional options and information useful in exploring the law:
Toggle Legal Text – Selecting this option will show all the legal text used to answer questions for this jurisdiction.

Toggle Full Place Profile – Selecting this option will show all questions and answers for this jurisdiction, regardless of what was selected using the Filter or Explore tabs.

Toggle Size – Selecting this option will make the profile larger, but will not change the information displayed.

Legal Text History – This interactive timeline displays when changes in the law have occurred within a jurisdiction. Using the arrows to the left or right, users may explore how the law has changed over time as new amendments to the law have been enacted. The timeline will change from gray to a shade of yellow when the jurisdiction passed its first relevant law. Each change in the law after that is marked by a break in the timeline.

Map and Profile Legend
There are a few symbols to be aware of in both Map and Profiles display modes:

Section Symbol – Clicking this symbol will open a window that displays excerpts from the law that correspond to the question and answer.

Caution Note – Clicking on this symbol will open a small window that displays text that describes important caveats about the question and answer.

DATASET RESOURCES
Each dataset homepage includes the following resources available for download:

- Data: The Data file exports in CSV. format and may contain two tabs. The “Statistical Data” tab contains the legal variables coded in the dataset, displayed as values defined in the accompanying Codebook. The “Summary Data” tab contains the legal variables coded in the dataset in text form, as well as the accompanying citations and any caution notes that may be included. Note: if there is only one tab available for download it will be the “Statistical Data” as described above.

- Codebook: The Codebook defines all of the coded variables in the dataset. The Codebook lists the question, question type, variable name, variable value and variable label. The Codebook should be used in conjunction with the Statistical Data extract.

- Research Protocol: The Research Protocol is a comprehensive document that outlines the entire methodology of the project, including the scope, inclusion and exclusion
criteria, data collection methods, definitions, coding scheme decisions, as well as the quality control process.

- Summary Report: The Summary Report provides a snapshot of important findings from the dataset.

ADDITIONAL INFORMATION

For more information about pharmacist’s scope of practice and related laws, please refer to the following resource:
